

Presentation

A presentation is a commitment to the audience!

You can live up to this commitment by

- being very well prepared,
- and delivering an informative talk,
- that is well-structured and engaging.

Presentation

To give a good presentation means:

- Intensive preparation, at least one **trial run** (e.g. virtually with friends)
- Stay within **the time limit** (max. 15 minutes)
- Clear arguments and **structure**
- Emphasize **links between** different ideas and **parts of the talk**
- **Speak loud** enough and **clear**
- Provide **examples, analogies**, perhaps use questions
- Keep **eye contact** with the audience
- Anticipate **questions** and **limitations**

Presentation – Outline

1. Introduction (ca. 2-3 minutes)

- State and motivate the research question
- Slide with an outline of the talk

2. Main body (ca. 10 minutes)

- Present the key analysis/set-up of the original study
 - Describe how your extension adds to the paper!
- Present your own extension and results

3. Discussion and conclusion (ca. 2-3 minutes)

- Critical appraisal
 - Summary and outlook
-

Presentation – Slides

A good presentation requires adequate visual support:

- Continuous use of slides
- Only visualize information that is crucial for the talk
- Sufficient font size (at least 18pt)... Otherwise one cannot read it!
- DON' T WRITE IN CAPITAL LETTERS
- Provide page numbers

Many thanks

We are looking forward to your talks!
